EXECUTIVE SUMMARY

❖ Languages

- JavaScript leads current usage(16k+).
- SQL & HTML/CSS rank 2nd & 3rd.
- Python holds strong at #5

❖ Databases

- PostgreSQL dominates (10k+).
- MySQL & SQLite follow.
- Supabase is emerging as a future-desired platform.

❖ AWS is the clear leader (10,871 users). Microsoft Azure & Google Cloud round out the top 3.

❖ React & Node.js dominate both current usage and future desire. Next.js & FastAPI are gaining rapid traction.

❖ 25–34 age group is the largest cohort (7,788). Bachelor's degree is the most common education level.

❖ Rust, Go & TypeScript are the fastest-rising languages. Svelte, FastAPI & Supabase are hot newcomers.

INTRODUCTION

Purpose of the report, Target Audience & Value of the analysis

- ❑ Why this report exists — To transform raw Stack Overflow survey data into a structured analysis of current and future technology trends, giving a clear picture of where the global developer ecosystem stands today and where it is heading.
- ❑ Who it is for — Primarily aimed at developers, data professionals, and students planning their learning roadmap, as well as HR teams, EdTech platforms, and business leaders making technology or hiring decisions.
- ❑ What it covers — The analysis spans four key dimensions : Language, database, platform, and framework usage (current vs. future) Developer demographics including age, education, and geography
- ❑ What makes it valuable — Highlights high-signal trends like the rise of TypeScript, Next.js, PostgreSQL, and cloud platforms, helping individuals and organizations prioritize what actually matters rather than chasing noise.
- ❑ The bigger outcome — Bridges the gap between survey data and real-world strategy — whether that means choosing the right skill to learn next, designing a better developer tool, or building a smarter hiring pipeline.

METHODOLOGY

- Collect Survey Data and explore its content:
 - Web Scraping.
 - APIs.
 - Request Library.
- Data Wrangling:
 - Handling Missing data.
 - Correcting Data types.
 - Removing Duplicates.
- Exploratory Data Analysis:
 - Analyzing the distribution.
 - Handling Outliers.
 - Correlations.
- Data Visualization:
 - Highlight distribution of data, relationships, the compositions and comparison of data.
- Dashboards:
 - Developed Interactive dashboards to present the analyzed data in a user-friendly and insightful manner

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

➤ Findings

- JavaScript, SQL & HTML/CSS are at Top 3 in current Year.
- SQL continues to rank among the most important technical skills, reflecting the growing demand for data driven decision making.
- Rust, Go & TypeScript show strong future growth.
- Python hold a significance position currently and for future.

➤ Implications

- JavaScript & HTML/CSS are popular due to the high demand of web development. Also, Typescript is getting more popular.
- SQL is in high demand for future, valuable for data roles like data analysts, data scientists, etc.
- The sustained popularity of python suggest strong career opportunities in data analytics, data science, and backend development.

DATABASE TRENDS

Summarize key trends shown in the charts.

DATABASE TRENDS - FINDINGS & IMPLICATIONS

➤ Findings

- PostgreSQL dominates and grows further.
- Redis Jumps significantly. from 6th to 2nd place.
- MySQL loses ground.

➤ Implications

- Prioritize PostgreSQL skills.
- Learn Redis.
- Don't Over-invest in MySQL.
- NoSQL remains niche but stable.

DASHBOARD

DASHBOARD TAB 1: Current Technology Usage

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

➤ Findings

- JavaScript leads current usage (16k+).
- PostgreSQL dominates (10k+).
- AWS is the clear leader (10,871 users).
- React & Node.js dominate both current usage and future desire.
- 25–34 age group is the largest cohort (7,788). Bachelor's degree is the most common education level.
- Svelte, FastAPI & Supabase are hot newcomers.

➤ Implications

- Master TypeScript & Python.
- Adopt PostgreSQL as default DB.
- Embrace Next.js & React.
- Go Cloud-Native with AWS + Azure, AWS + Azure cover 60%+ of market demand.
- Watch Rust, Supabase & FastAPI.
- Target the 25–34 Segment.

CONCLUSION

- **PostgreSQL & JavaScript are the undisputed leaders** — dominating both current usage and future demand, making them non-negotiable core skills for any tech professional.
- **The future belongs to cloud-native & modern stacks** — AWS leads platforms, React/Next.js lead webframes, and Redis/TypeScript are rapidly rising; adapting to this stack is essential.
- **Demographics signal a young, degree-educated workforce** — the 25–34 age group (7,788) with Bachelor's degrees drives the industry, indicating a competitive but opportunity-rich market.
- **Emerging tools like Supabase, FastAPI & Svelte are gaining traction** — early adoption of these technologies can provide a competitive edge before they hit mainstream demand.
